Huddersfield HD1

## Professional Profile

A versatile and ambitious individual who is developing a strong academic background whilst studying BSc (Hons) Games Development (Production) at the University of Huddersfield. Additionally whilst working as a freelancer in the game industry has developed a strong technical skill set, with the ability to complete a range of tasks such as 3D modeling, texturing and scripting (unreal engine blueprint, Luau, C# and C++), as well as communicating effectively with clients. Through hard work and determination, also able to teach skills to others and share a passion for the creation of games. Always taking pride in personal growth and development, now seeking to progress and be an asset to any future employer, placement or project.

## School and College Education

|                            |   |                |
|----------------------------|---|----------------|
| University of Huddersfield | BSc (Hons) Games Development (Production) (predicted 2:1)   | 2023 - Present |
| Tameside College           | Level 3 National Extended Diploma in Animation and Game Design, (Distinction*, Distinction*and Distinction) | 2020 - 2023    |
| Denton Community College   | GCSE's; English Lang (4), English Lit (4), Maths (4), Science (4-4) and Photography (5)                     | 2016 - 2020    |

## Career Experience

**Self Employed (Game Production and Design)** Tutor 2018 - Present

- Successfully able to tutor others in relation to script (Luau), 3D model and texture
- Enjoy helping others to develop and grow their own abilities
- Demonstrate effective communication skills when booking and communicating with clients
- Proactively engage with clients with regards to their projects and offering more tutoring if needed
- Developed excellent time management and organisational whilst balancing the role alongside a degree

**Self Employed (Game Production and Design)** Freelance 2018 - Present

- Responsible for working on a variety of games and projects on the Roblox platform
- Demonstrate a wide range of skills in game design and production (highly transferable skill set)
- Script for projects in Luau in both Backend (examples include semi-complex back end systems, such as data stores, combat mechanics, custom libraries)
- Experienced in scripting for various gameplay frameworks such as permadeath to more causal styles) and Frontend (examples include developing user interfaces that complement back end systems)
- Actively contributed to the nominated game Deepwoken, where the model was featured in the game and later developed in a maker-ship plushie. Deepwoken now has 1 billion total visits, and 14,000 daily users
- Gained experience when scripted for the game Birdcage which now has 4.3 million total visits and up to 400 daily users

**Inspire Task Force**

Volunteer

**Placement 2022**

- Gained strong communication skills, assisting with tasks such as bringing out food and speaking to elderly residents
- Responsible for helping residents with computer and phone issues, such as expanding storage

**Levenshulme Inspire Centre**

Volunteer

**2019 - 2019**

- Entrusted to complete administration tasks such as sorting through dates and sending emails
- Gained experience when using computers to create posters
- Developed practical skills when fixing and setting up appliances such as projectors and TV's
- Interacted and assisted elderly residents with any needs they may have had

**Notable Achievements**

- Won 1st Place in a week-long Game jam in the 1st year of University with the creation of Couch co-op Game
- Won 2nd place in a week-long Game jam in the 1st year of University with the creation of a horror game
- Extensive knowledge of the game engine Luau
- Good working knowledge of game engine Unreal engine blueprint, C# and C++
- Extensive knowledge of 2D and 3D modelling

**Professional Objectives Statement**

Over the coming years I wish to build upon my academic experience that has been gained within game production and design. I also believe that I have developed a unique skill set derived from self employment, which can be transferred to any new position, career or placement, in turn becoming a major asset to any future employer or project.
